GLP-1 Side-Effects Support

SUPPORT GLP-1 PATIENTS NATURALLY WITH TARGETED BOTANICALS

GLP-1 receptor agonists are transforming metabolic care – but often at a cost. Slowed gastric motility, impaired bile flow, and symptoms like nausea, bloating, and constipation can hinder patient compliance and quality of life.

Biocidin Botanicals® offers a clinically aligned, three-part protocol to help mitigate these common side effects.

Liver GB+™

A powerful bitters-based formula that enhances bile flow and activates liver detoxification pathways – supporting fat digestion and reducing GLP-1-associated nausea.*

Motility Assist™

Promotes coordinated gastric emptying and intestinal motility with no harsh stimulants – easing bloating and constipation while optimizing GI function.*

Biotonic®

A restorative tonic of adaptogenic and bitter herbs that strengthens digestive tone, supports adrenal resilience, and offers immediate nausea relief – all while enhancing overall digestive capacity.*

Together, this trio supports gut-liver synergy and digestive resilience – keeping your patients more comfortable, compliant, and clinically successful on GLP-1 therapy.

Product	Dose
Liver GB+™	1 capsule 2x/day, 15 minutes before a meal
Motility Assist™	1-2 capsules a day, before bedtime
Biotonic®	40-60 drops with meals and as needed for nausea or diarrhea

Product	Wholesale	Retail
Liver GB+™	\$35.95	\$59.97
Motility Assist™	\$19.45	\$35.97
Biotonic®	\$23.95	\$39.97
Total Cost	\$79.35	\$135.91

Oral Health Support

ORAL HEALTH, SYSTEMIC IMPACT: A MICROBIOME-CENTERED PROTOCOL

The oral cavity is more than a starting point – it's a critical gateway to systemic health. **Biocidin Botanicals' three-step dental protocol is designed to support a balanced oral microbiome, reduce inflammation, and strengthen enamel**, all without the use of harsh chemicals or antimicrobials.

Dentalcidin®

A microbiome-friendly formula featuring broad-spectrum botanicals that reduce plaque, soothe gingival inflammation, and support healthy oral immunity.

Dentalcidin® LS

Targets the subgingival space with potent botanicals to disrupt biofilms and address the root causes of gingivitis and periodontitis – without alcohol or synthetic agents.

Dentalmin PRO™

A fluoride-free, hydroxyapatite-based remineralizing agent that strengthens enamel, promotes natural whitening, and supports long-term dental resilience.

Step	Dose
Step 1	Floss thoroughly to remove debris and disrupt plaque between teeth
Step 2	Use Dentalcidin® LS Oral Rinse – swish for 1-2 minutes to deliver subgingival botanical action
Step 3 (AM)	Brush with Dentalcidin® Toothpaste to reduce plaque, calm inflammation, and support oral immunity
Step 3 (PM)	Brush with Dentalmin PRO™ to strengthen and remineralize enamel overnight

Product	Wholesale	Retail
Dentalcidin®	\$18.95	\$29.97
Dentalcidin® LS	\$26.95	\$44.97
Dentalmin PRO™	\$11.45	\$19.97
Total Cost	\$57.85	\$94.91

Used together, this synergistic trio helps restore microbial balance, reduce periodontal disease risk, and support strong, vibrant smiles while aligning with integrative and functional care values

Comprehensive Microbiome Detox, SIBO/SIFO Support

DETOX DONE RIGHT

Detoxification is more than just providing liver support – it requires modulating the microbiome, optimizing bile flow, and binding toxins to be truly effective and well-tolerated by patients.

After reducing the pathogen load, how can you optimize fat digestion, toxin clearance, and patient comfort? **First, stimulate bile flow. Then, bind and remove microbial byproducts and inflammatory toxins – all while reinforcing microbiome balance and gut motility.**

Biocidin Botanicals® offers a comprehensive program that delivers an integrated, evidence-based approach that supports every stage of the detox process.

Biocidin®

A broad-spectrum botanical blend that targets biofilms and rebalances the microbiome, reducing microbial-derived toxin production at the source.

G.I. Detox+®

A professional-grade binder that captures endotoxins, heavy metals, and metabolic waste, preventing their reabsorption and easing detox-related symptoms.

Proflora® 4R

A spore-based probiotic clinically shown to support gut barrier integrity, immune modulation, and microbiome diversity.

Motility Assist™

Encourages coordinated intestinal movement and gastric emptying to reduce bloating and promote regular elimination – without harsh laxatives.

Liver GB+™

Formulated with traditional bitters to promote healthy bile flow, liver detoxification pathways, and fat digestion.

This strategic combination addresses microbial imbalance, gut-liver drainage, and systemic toxin burden – unlocking a safer, more complete detoxification experience for patients with chronic inflammatory or toxin-related conditions.

Liver GB+™	1 capsule 2x/day, 15 minutes before a meal
Motility Assist™*	1-2 capsules a day, before bedtime

*Add if needed for delayed digestion, constipation, or IBS.

Rapid Immune Support

TARGETED BOTANICAL SUPPORT FOR IMMUNE RESILIENCE

Biocidin Botanicals offers a thoughtfully crafted, evidence-based protocol that works in harmony with the body – calling the immune system into action while delivering targeted antimicrobial support. **This curated program helps the body recognize, respond to, and resolve microbial challenges across both mucosal and systemic pathways.**

Biocidin® LSF

Liposomal delivery of broad-spectrum botanicals designed for systemic microbial balance, immune activation, and biofilm disruption.

Olivirex®

A synergistic olive leaf formula that supports the body's innate defenses during acute and chronic infections, with added botanicals for detox and lymphatic flow.

Biocidin® TS

Fast-acting immune support for the upper respiratory tract, shown in a human clinical trial to increase secretory IgA (sIgA) levels by 66% within 60 minutes of use – enhancing first-line mucosal defense.

This trio supports barrier immunity, modulates inflammatory load, and promotes microbial clearance – an ideal toolkit for clinicians looking to prevent or manage acute or lingering immune challenges.

Product	Dose
Biocidin® LSF	2 capsules 2-3x/day until symptoms resolve
Olivirex®	3 pumps 3-4x/day until symptoms resolve
Biocidin® TS	3 sprays every 1-4 hours until symptoms resolve

Product	Wholesale	Retail
Biocidin® LSF	\$48.45	\$80.97
Olivirex®	\$23.45	\$38.97
Biocidin® TS	\$16.95	\$28.47
Total Cost	\$88.85	\$148.41

Gut-Brain Axis Support

INTEGRATED BOTANICAL APPROACH FOR TARGETING THE GUT-BRAIN AXIS

The gut-brain axis plays a central role in regulating inflammation, mood, cognition, and immune response. Disruptions in this bidirectional system – often driven by microbial imbalances, impaired detoxification, compromised motility, and mucosal damage – can present as GI symptoms, brain fog, fatigue, and mood instability. Supporting this axis requires a multifaceted strategy that addresses root causes across both systems.

Biocidin Botanicals® offers a clinically relevant toolkit designed to restore microbial balance, enhance detox pathways, and support motility and mucosal integrity, providing practitioners with effective tools for gut-brain axis restoration.

Biocidin® – Microbial Balance & Biofilm Disruption

A broad-spectrum botanical formula that targets dysbiosis and disrupts biofilms, creating a foundational shift in microbial terrain that reduces endotoxin burden and neuroinflammatory signaling.

G.I. Detox+® – Comprehensive Toxin Binding

Binds and removes a wide array of biotoxins — including LPS, mold metabolites, and histamine – mitigating systemic and neurological effects of gut-derived inflammation.

G.I. InnerCalm® – Soothing Gut and Mind

A dual-action formula featuring GutGard®, glycine, and PepZin GI™ to support mucosal integrity and modulate both enteric and central nervous system signaling pathways – simultaneously addressing the gut lining and the emotional terrain.

Liver GB+™ – Optimizing Detox Pathways

Enhances hepatic and biliary function using botanicals and TUDCA to optimize bile flow and reduce enterohepatic recirculation of neurotoxic compounds. Healthy bile flow also supports the production and microbial conversion of primary to secondary bile acids, which have been shown to exhibit anti-inflammatory and neuroprotective effects within the central nervous system by modulating microglial activation and blood-brain barrier integrity.

Motility Assist™ – Enhancing Digestive Flow

Promotes coordinated peristalsis to prevent stasis and microbial overgrowth, supporting both microbiome resilience and neurochemical balance via the enteric nervous system. Includes researched ingredient Digexin® – proven to increase serotonin and reduce cortisol.

Tick Bite & Acute Infection Support

RAPID IMMUNE ACTIVATION & ANTIMICROBIAL ACTIVITY

For acute tick bites and early-stage infections, rapid immune activation and antimicrobial support are critical. This thoughtfully designed supplement bundle offers a comprehensive, layered approach to speed recovery, minimize Herxheimer reactions, and support your patients every step of the way.

For patients with acute tick bites or early-stage infections, **Biocidin Botanicals®** provides a **strategically layered protocol** to address microbial threats, immune response, and toxin load.

Biocidin® LSF

Liposomal delivery of broad-spectrum botanicals to support systemic microbial clearance, biofilm disruption, and rapid immune engagement. With both researched activity against *Borrelia* and a vault of clinically reported outcomes on many vector-borne pathogens, Biocidin® LSF has become an essential component for any medicine cabinet.

Olivirex®

A synergistic olive leaf-based formula that has potent antiviral, antibacterial, and antifungal activity. It also supports innate immune defenses, modulates inflammation, and enhances lymphatic flow during infection.

G.I. Detox+®

Binds microbial byproducts, mycotoxins, and inflammatory metabolites (including LPS), reducing Herxheimer reactions and supporting safe detoxification.

This combination offers a comprehensive response to acute microbial exposures, including tick-borne threats – supporting immune readiness, minimizing inflammatory burden, and enhancing patient recovery.
