G.I. InnerCalm™ is an easy-to-use gut powder that offers soothing daily support for maintaining a healthy digestive tract while also supporting a healthy nervous system, mood, and sleep.

Biocidin Botanicals is uniquely qualified to bring this innovative formulation to the field. We understand that gut health is essential to overall health. It's been our focus for over 30 years.

To craft this product, we drew on existing research. But a good formula requires more than just research – it requires hands-on experience. That's where our robust clinical team comes in. Our decades of combined experience have positioned us to observe emerging patterns, led us to root causes of illness, and provided the wisdom to identify effective clinical strategies.

That's why we're able to offer clinician-crafted solutions that answer the call for simplicity and efficacy.
